

Health Subgroup Meeting

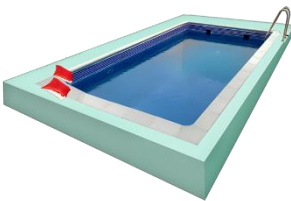

(11 June 2026)

Easy Read Summary

What was discussed

1. Formont pool problems

The pool often breaks because of the old boiler.

This affects people who need who use, especially wheelchair users.

The group agreed a long-term fix is needed.

We will talk about this more at the next meeting

2. Health services and delays

There are delays getting replies from health organisations (ICB).

This may improve after changes planned for September.

3. Health checks survey

A survey about annual health checks has had no responses so far.

It will stay open longer.

4. Hospital support

Families can contact the hospital nurse for help with reasonable adjustments.

A [quality check tool for hospital passports](#) is now available online.

5. Behaviour support

The Positive Behaviour Support Team gave a presentation to the group.

They provide support and training to help people live better lives and stay in the community.

The group thought more support is needed for children before they become adults.

6. Making decisions about treatment

Some people refuse treatment (like medical equipment). Staff should support people to understand and make their own choices.

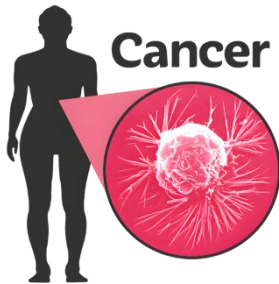

Reasonable adjustments are offered when people refuse for reasons like anxiety.

The group will look at examples of reasonable adjustments working well, so we can help more people.

7. Cancer awareness

People are encouraged to learn about checking themselves for cancer.

This will be discussed more next time.
