3.	Schedule Summary	18 – 20
4.	Leaseholder Address List	21 - 70

Access Agreement: Special Terms

London Borough of Enfield's (LBE) housing portfolio has a fixed-term-fixed-price (FTFP) contract in place with TotalEnergies which is set to expired on 30th of September 2026. From 1st October 2026, the Housing Portfolio will join the LASER (KCC) Flexible Energy Framework on a Managed Service Level to align the contract terms with the Corporate Portfolio.

This will involve a change of supplier to nPower Ltd which would typically require customer commitment at least 6 months ahead of the required flexible contract start date to ensure successful registration of supplies, pricing issuance and onboarding onto our Managed Service. In this instance as an exception, we will aim to register the supplies via our Additional Business Process in recognition that the LBE Corporate Portfolio is already registered with Npower & utilises the LASER Managed Service.

Risk of Delayed Registrations

Due to the possibility the agreement may be signed less than 3 months in advance of the requested contract start date of 1st of October 2026 there is a risk not all electricity supplies will be registered in time. Where this is the case, the incumbent supplier may bill sites at out of contract rates for a period of time.

Whilst best endeavours will be made to facilitate a contract start date of 1st October 2026 for avoidance of doubt LASER accepts no liability for any costs incurred due to late registrations or out of contract rates billed from your incumbent supplier.

The following conditions apply to mitigate risk with the registrations and service set up process:

- LBE will commit to working with the incumbent supplier to settle all queries, resolve any outstanding debt, and invoices prior to registration to avoid any delays with the transfer.
- LBE will commit to providing all of the required information to LASER to facilitate onboarding & pricing including confirming current MOP/DC arrangements, billing requirements and providing HH Data, Direct Debit & VAT forms and all other required information.
- The option to register & price supplies via the additional business route cannot be guaranteed, dependent on volume, market availability and timescales, and therefore a 12-month Fixed Bridging Price will be secured if the additional business route is not possible.
Where a Bridging Price is required, LASER will secure the fixed price on your behalf; once the Access Agreement Variation has been fully signed by all parties.

Securing Fixed Bridging Prices if required

The following terms apply in relation to securing Fixed Bridging Prices. This applies to the *Housing Portfolio supplies joining from 1st October 2026 only*:

Fully fixed prices from suppliers are validated against the energy market but do not include a breakdown of commodity and non-commodity price components. For the avoidance of doubt, the fully fixed prices will only vary due to a change in law or change in the rate of a pass-through tax or levy (including the Climate Change Levy and Value Added Tax).

Upon expiry of the initial fixed-term fixed-price period, all volume will enter into LASER's flexible purchasing basket for the remainder of the supply period 1st October 2027 to 30th September 2028.

In order to authorise LASER (Kent County Council) to proceed with securing the initial 12-month fully fixed prices on your behalf the Participating Authority agrees to the following as part of this agreement: *The Participating Authority hereby appoints LASER (Kent County Council) as our agent and gives authority to LASER to negotiate, agree and enter in to contracts for the supply of electricity, gas, metering and related services and to negotiate, agree and enter in to amendments and variations of those contracts.*

Site Schedule

Participating Authority:	London Borough of Enfield
Supplier:	nPower
Contract Start Date:	1st October 2026
Contract End Date:	30th September 2028

Portfolio Summary*	HH Electricity	NHH Electricity	UMS Electricity
Number of Supplies	2	976	1
Total Estimated Annual Usage (kWhs)	58,036	6,642,316	20,069
LASER Recovery Fees (£/Supply/Annum)*	TBA	TBA	TBA

Please note the following which are applicable to the agreement.

1 - Please note the Number of Supplies and Total Estimated Annual Usage is a representation of the Customer portfolio at the time of securing agreements. This may vary dependent on actual usage and with site additions and removals during the course of the contract.

2 - Service level indications are MS (Managed Service), POSO (Procurement Only Service Option) and Housing Service. For the MS bills are sent from the Supplier to LASER for validation, processing and payment.

3 - The main Procurement Types are PIA (Purchase in Advance) and PWP (Purchase within Period), further options may become available during the agreement. The Participating Authority can apply to change the Procurement Option during the course of the agreement, if agreed by the Contracting Authority via a variation, and with a minimum of 6 months notice required in advance of the Flex product anniversary. Prices for any Procurement Type will be based on purchases made following the completion of a signed agreement and sites being added to the Flexible basket. Pricing for sites added mid-way through a contract period will be added via a Flex additions price or a Fixed price depending on availability.

4 - The Participating Authority has opted for Renewable Energy Guarantees of Origin (REGO) and delegates authority for LASER to secure these certificates on their behalf for each 12 month supply period of the Flex contract. This will apply for the full commitment term, however the Participating Authority can opt out of REGO or RGGO providing 3 months notice is provided to LASER in writing in advance of the 12 month flexible supply period. If REGO is to be applied to only certain sites this will be shown in the site listing.

*Please note, the LASER recovery fees are included in supplier standing charges

Estimated Annual Consumption (kWh)⁴:	43,756
LASER Fees⁵:	£117.30/Supply/Annum

Please note the following which are applicable to the agreement:

1 - Please refer to the Service Level Agreement for your selected service option.

2 - The main Procurement Types are PIA (Purchase in Advance), PWP (Purchase within Period) and further options may become available during the agreement. The Participating Authority can apply to change the Procurement Option during the course of the agreement, if agreed by the Contracting Authority via a variation, and with a minimum of 6 months notice required in advance of the Flex product anniversary. Prices for any Procurement Type will be based on purchases made following the completion of a signed agreement and sites being added to the Flexible basket. Pricing for sites added mid-way through a contract period will be added via a Flex additions price or a Fixed price depending on availability.

3 - For sites where the Participating Authority has opted for Renewable Energy Guarantees of Origin (REGO) or Renewable Green Gas of Origin (RGGO) certificates, they delegate authority for LASER to secure these certificates on their behalf for each 12 month supply period of the Flex contract. This will apply for the full commitment term, however the Participating Authority can opt out of REGO certificates by providing 3 months in advance of the Flex product anniversary.

4 - Please note the Number of Supplies and Total Estimated Annual Usage is a representation of the Customer portfolio at the time of securing agreements. This may vary dependent on actual usage and with site additions and removals during the course of the contract. Fees may be reviewed if there are significant variations.

5 - Please note the base year for the CORPORATE fees presented based on the current portfolio is 1 October 2023 to 30 September 2024. This is subject to annual RPI/CPI increases.

5 - Please note the base year for the HOUSING fees presented based on the current portfolio is 1 October 2026 to 30 September 2027. This is subject to annual RPI/CPI increases.
