Section 1 Introduction and Objectives

1.1 Introduction

A video Surveillance system has been introduced to the London Borough of Enfield. This system, known as the 'Enfield Public Safety Centre VSS System', comprises a number of cameras installed at strategic locations. All of the cameras are fully operational, with most being pan, tilt and zoom facility type. Others are fixed cameras, images from which are presented in the same room. Secondary monitoring facilities are located at the local Metropolitan Police Control Rooms located at Edmonton Green and the centralised Police Control Room at Bow, but there are no recording facilities at those police locations other than the Public Safety Centre (hereon referred to as "the Centre") and its disaster recovery (DR) site located at the Civic Centre.

For the purposes of this document, the 'owner' of the system is London Borough of Enfield.

For the purposes of the United Kingdom General Data Protection Regulation (UK GDPR) and Data Protection Act 2018 (hereinafter "the data protection legislation") the 'data controller' is London Borough of Enfield (Note 1.)

The 'system manager' is Darren Woods

The Enfield Public Safety Centre (EPSC) VSS system has been notified to the information Commissioner and has been accredited in 2015 by a UKAS inspectorate SSAIB as an Alarm Receiving Centre (ARC) to BS 5979 cat 2 (now combined with BS 9518) and also for Lone Worker services to BS 8484.

Details of key personnel, their responsibilities and contact points are shown at appendix A to this Code.

*Note1. The **data controller** is the person who (either alone or jointly or in common with other persons) determines the purposes for which and the manner in which any personal data are to be processed. It must be a legal entity e.g. person, organisation or corporate body and in the case of partnerships all partners may be considered to bear the responsibility.*

1.2 **Partnership statement in respect of The Human Rights Act 1998, criminal Justice and Public Order Act 1994 sect 163 and the Protection of Freedoms Act 2012 sect 30**

1.2.1 The partnership recognises that public authorities and those organisations carrying out the functions of a public service nature are required to observe the obligations imposed by the Human Rights Act 1998, and consider that the use of VSS in the London Borough of Enfield is a necessary, proportionate and suitable tool to help reduce crime, reduce the fear of crime and improve public safety in the Borough of Enfield.

1.2.2 This assessment is evidenced by an agreed 'operational requirement' as well as a Privacy impact assessment (and any survey or consultation if applicable). Section 163 of the Criminal Justice and Public Order Act 1994 creates the power for local authorities to provide VSS coverage of any land within their area for the purposes of crime prevention or victim welfare and it is also considered a necessary initiative by the Partners for your system towards their duty under the Crime and Disorder Act 1998.

- 1.2.3 It is recognised that operation of the Enfield Public Safety Centre System may be considered to infringe on the privacy of individuals. The partnership recognises that it is their responsibility to ensure that the scheme should always comply with all relevant legislation, to ensure its legality and legitimacy. The scheme will only be used as a proportional response to identified problems and be used only in so far as it is necessary in a democratic society, in the interests of national security, public safety, the economic wellbeing of the area, for the prevention and detection of crime or disorder, for the protection of health and morals, or for the protection of the rights and freedoms of others.
- 1.2.4 The legislation concerning VSS in sect 30 of the Protection of Freedoms Act 2012 legislation has produced a VSS Code of Practice from the new Biometric Surveillance Camera Commissioner that has been approved by Parliament and as a relevant authority (as defined under section 33 of the 2012 Act) it must pay due regard to the new code.
- 1.2.5 Enfield Council in managing its VSS control room operations under this Code of practice will endorse and comply with all 12 guiding principles of the new Surveillance Camera Code of Practice amended Nov 2021 (see appendix K).
- 1.2.6 The Codes of Practice and observance of the Operational Procedures contained in the manual shall ensure that evidence is secured, retained and made available as required to ensure there is absolute respect for everyone's right to a Fair trial.
- 1.2.7 The EPSC System shall be operated with respect for all individuals, recognising the right to be free from inhuman or degrading treatment and avoiding discrimination on any ground such as sex, race, colour, language, religion, political or other opinion, national or social origin, birth or other status.

1.3 Objectives of the System

- 1.3.1 The objectives of the Enfield Public Safety Centres Video Surveillance System as determined by the owners / partnership which form the lawful basis for the processing of data are: -
- To help reduce the fear of crime
 - To help deter crime
 - To help detect crime and disorder or other public safety issues and provide evidential material suitable for court proceedings
 - To assist in the overall management of Enfield Borough and other public areas within its client base
 - To enhance community safety, assist in developing the economic wellbeing of the London Borough of Enfield and encourage greater use of the Borough's facilities, University, shopping areas, car parks etc
 - To assist the Local Authority in its enforcement and regulatory functions within the London Borough of Enfield area
 - To assist in Traffic Management and Enforcement in its enforcement and regulatory functions within the London Boroughs of Enfield area
 - To assist in supporting civil proceedings which will help detect crime
 - Any other specific objective identified by the owners or partners of the scheme

1.4 Procedural Manual

This Code of Practice (hereafter referred to as 'the Code') is supplemented by a separate 'Procedural Manual' which offers instructions on all aspects of the day to day operation of the system that is a restricted document. To ensure the purpose and principles (see Section 2) of the VSS systems are realised, the procedural manual is based and expands upon the contents of this Code of Practice.

Section 2 Statement of Purpose and Principles

2.1 Purpose

The purpose of this document is to state the intention of the owners and the managers, on behalf of the partnership as a whole and as far as is reasonably practicable, to support the objectives of the London Borough of Enfield Video surveillance system, (hereafter referred to as 'The System') and to outline how it is intended to do so.

- 2.1.1 The 'Purpose' of the system, and the process adopted in determining the 'Reasons' for implementing 'The System' are as previously defined in order to achieve the objectives detailed within Section 1.

2.2 General Principles of Operation

- 2.2.1 The system will be operated in accordance with all the requirements and the principles of the Human Rights Act 1998.
- 2.2.2 The operation of the system will also recognise the need for formal authorisation of any covert 'Directed' surveillance or crime trend (hotspot) surveillance as required by the Regulation of Investigatory Powers Act 2000 and local police force policy.
- 2.2.3 There is a procedure for directed surveillance requests from third party organisations wishing to use this facility. Directed Surveillance Forms are available from the Monitoring Centre and the procedure and forms are included in the Procedural Manual.
- 2.2.4 The system will be operated in accordance with the data protection legislation at all times and comply with the Protection of Freedoms Act 2012 VSS Code of Practice 12 guiding principles as contained in Appendix C.
- 2.2.5 The System will be operated fairly, within the law, and only for the purposes for which it was established and are identified within this Code, or which are subsequently agreed in accordance with this Code of Practice.
- 2.2.6 The system will be operated with due regard to the principle that everyone has the right to respect for their private and family life and their home.
- 2.2.7 The public interest in the operation of the system will be recognised by ensuring the security and integrity of its operational procedures is maintained.
- 2.2.8 Throughout this Code of Practice, it is intended, as far as reasonably possible, to balance the objectives of the System with the need to safeguard the individual's rights. Every effort has been made throughout this Code to indicate that a formal structure has been put in place, including a complaints procedure, by which it can be identified that the System is not only accountable, but is seen to be accountable.
- 2.2.9 Participation in the system by any organisation, individual or authority assumes an agreement by all such participants to comply fully with this Code and to be accountable under this Code of Practice.
- 2.2.10 **Copyright:** Copyright and ownership of all material recorded by virtue of The System will remain with the data controller.

2.3 Cameras and Area Coverage

- 2.3.1 The areas covered by the system to which this Code of Practice refers are the public areas within the responsibility of the operating partners and cover Enfield Borough and other client areas as may be monitored by The System.
- 2.3.2 From time to time Re-deployable or mobile cameras may be temporarily sited within the area, and deployed by evidence based tasking procedures. The use of such cameras, and the data produced by virtue of their use, will always accord with the objectives of the Video Surveillance System (Previously referred to as CCTV) and is governed by these Codes and Procedures.
- 2.3.3 Some of the cameras offer full colour, pan tilt and zoom (PTZ) capability, High Definition (HD) recording, or may automatically switch to monochrome in low light conditions.
- 2.3.4 Any Body Worn Video (BWV) cameras connected into the system will be operated in accordance with best practice and industry standards and data handling will comply with DPA and this code.
- 2.3.5 None of the cameras forming part of the System will be installed in a covert manner. Some cameras may be enclosed within 'All weather domes' for aesthetic or operational reasons but the presence of all cameras will be identified by appropriate signage
- 2.3.6 Cameras located around and within the Centre are primarily for the protection of the Centre but may be used for crime prevention and detection as appropriate. Internal cameras are primarily for security and are part of the Centres requirement as an accredited Alarm Receiving Centre (ARC). These may also be used for Centre management, performance and probity issues and are appropriately signed.
- 2.3.7 A list showing the number and location of all street cameras previously attached to these Codes is now displayed on the council's website by way of mapping and lists. Which are updated and check monthly

2.4 Monitoring and Recording Facilities

- 2.4.1 A staffed monitoring centre is located at *Enfield Public Safety Centre, Centre Way, Clavering's Industrial Estate, Edmonton, London N9 0AH*. The VSS equipment has the capability of recording all cameras simultaneously throughout every 24-hour period
- 2.4.2 Secondary monitoring equipment is located within police premises. However, no equipment, other than that housed within the main CCTV control room or its DR site, shall be capable of recording images from any of the cameras without permission and approved audit processes and only for approved DPA purposes. All systems are password protected via an administrator
- 2.4.3 Authorised users of the system may be permitted to have access to live streaming data through a secure Mobile Application on handheld devices or PC's that is managed through the control centre for permitted purposes under this code. Secondary recording on these handheld devices or PC's is strictly forbidden.

- 2.4.4 VSS operators are able to record images from selected cameras in real-time (25 fps), produce hard copies of recorded images, replay or copy any pre-recorded data at their discretion and in accordance with the Code of Practice. All viewing and recording equipment shall only be operated by trained, security cleared and authorised users to the standard set by the Centre Manager and or legislation such as the Private Security Industry Act licence requirements for contracted staff.
- 2.4.5 Authorised users of the system may be permitted to have access to recorded data by remote secure terminals. Data handling and audit will apply in accordance with DPA and this code.

2.5 Human Resources

- 2.5.1 Unauthorised persons will not have access to site without an authorised member of staff being present and approved prior notification of attendance in accordance with BS 5979 ARC and EPSC procedures on access control.
- 2.5.2 Specially selected, licenced, vetted and trained operators in accordance with the strategy as contained within the procedural manual shall staff the Public Safety Centre. As the current staffing is private sector security staff, all staff will be required to hold and maintain Private Security Industry Act (PSS) Sector licenses whilst employed at the centre.
- 2.5.3 All operators shall receive training relevant to their role in the requirements of the Human Rights Act 1998, the data protection legislation, Regulation of Investigatory Powers Act 2000 and the Codes of Practice and Procedures. Progressive and continuation and formal refresher training will be provided as necessary, and at least annually to the standard required by the Centre Manager and SIA Sector licence requirements.

2.6 Processing and Handling of Recorded Material

- 2.6.1 All recorded material, whether recorded digitally, in analogue format or as a hard copy video print, will be processed and handled strictly in accordance with the law and this Code of Practice and the centre's Procedural Manual.

2.7 Operators Instructions

- 2.7.1 Technical instructions on the use of equipment housed within the monitoring room are contained in a separate manual provided by the equipment suppliers. and Council

2.8 Changes to the Code of Practice

- 2.8.1 Any major changes to either the Code of Practice or upon the operation of the system will take place only after consultation with and upon the agreement of the Management within the Authority in the operation of the system.
- 2.8.2 A minor change, (i.e. such as may be required for clarification or that will not have such a significant impact) may be agreed by the Centre Manager and notified to those responsible for the Management of the system.

Notes.

- I. The installation of a camera is **overt** unless it is installed in a manner whereby its presence is deliberately intended to be concealed from the view of any person likely to be within the field of view of that camera.
 - II. Cameras which may be placed in domes or covered to reduce the likelihood of assessing their field of view, or to protect them from weather or damage, would not be regarded as covert provided that appropriate signs indicating the use of such cameras are displayed in the vicinity.
 - III. The use of 'dummy' cameras or signage as part of this CCTV System is **NOT PERMITTED**.
- 

Section 3 Privacy and Data Protection Public Concern

3.1.1 Although the majority of the public at large may have become accustomed to 'being watched', those who do express concern do so mainly over matters pertaining to the processing of the information, (or data) i.e. what happens to the material that is obtained.

Note: *'Processing'* means **obtaining, recording or holding** the information or data or **carrying out any operation or set of operations** on the information or data, including;

- i) *Organisation, adaptation or alteration of the information or data;*
- ii) *Retrieval, consultation or use of the information or data;*
- iii) *Disclosure of the information or data by transmission, dissemination or otherwise making available, or*
- iv) *Alignment, combination, blocking, erasure or destruction of the information or data.*

3.1.2 All personal data obtained by virtue of The System, shall be processed fairly and lawfully and, in particular, shall only be processed in the exercise of achieving the stated objectives of the system. In processing personal data there will be total respect for everyone's right to respect for their private and family life and their home.

3.1.3 Personal Data will be limited in the majority of data collected and recorded by this system and is defined as that reaching "recognition level" of an individual based upon the research and guidance taken from the Home Office Scientific Development Branch where the individuals details of head and torso are recorded at 50% of screen height or greater. Below this resolution level, it is not deemed Personal Data.

3.1.4 The storage and security of the data will be strictly in accordance with the requirements of the data protection legislation, other statutory legislation and additional locally agreed procedures.

3.2 Data Protection Registration

3.2.1 The operation of The System has been notified to the Office of the Information Commissioner at ico.org.uk in accordance with current Data Protection Regulation (UK GDPR) and listed under Registration Number: Z5492012

Data Controller: THE LONDON BOROUGH OF ENFIELD

Address:

CIVIC CENTRE
SILVER STREET
ENFIELD
MIDDLESEX
EN1 3XF

3.2.2 The 'data controller' for 'The System' is London Borough of Enfield and day to day responsibility for the data will be devolved to The Centre Manager

3.2.3 All data will be processed in accordance with the principles of the Data Protection Act 2018 and the General Data Protection Regulation (UK GDPR) which, in summarised form, includes, but is not limited to: (Personal Data has the meaning given in Article 4 of the General Data Protection Regulation (UK GDPR))

- i) All Personal Data will be obtained and processed fairly and lawfully.

- ii) Personal Data will be held only for the purposes specified.
- iii) Personal Data will be used only for the purposes specified, and disclosed only to the people, shown within these codes of practice.
- iv) Only Personal Data which are adequate, relevant and not excessive in relation to the purpose for which the data is held.
- v) Steps will be taken to ensure that Personal Data is accurate and kept up to date.
- vi) Personal Data will be held for no longer than is necessary.
- vii) Individuals will be allowed access to information held about them and, where appropriate, permitted to correct or erase it.
- viii) Procedures will be implemented to put in place security measures to prevent unauthorised or accidental access to, alteration, disclosure, or loss and destruction of, information.

3.2.4 Data protection Regulation compliant signage for the EPSC System (External signage)

3.3 Request for information (subject access)

- 3.3.2 Any request from an individual for the disclosure of personal data which he / she believes is recorded by virtue of the system will be directed in the first instance to the Data Protection Officer or Departmental Data Coordinator in accordance with council procedures. The Enfield Council subject access and policy procedures can be found on the following webpage: <https://www.enfield.gov.uk/services/your-council/our-policies-and-procedures/subject-access-policy-and-procedure>
- 3.3.3 If the request cannot be complied with without identifying another individual, permission from all parties must be considered (in the context of the degree of privacy they could reasonably anticipate from being in that location at that time) in accordance with the requirements of the General Data Protection Act 2018 (GDPR).
- 3.3.4 Any person making a request must be able to satisfactorily prove their identity and provide sufficient information to enable the data to be located. The appropriate 'Subject Access' request form is available on the council's website.

3.4 Exemptions to the Provision of Information

In considering a request made under the provisions of Section 45 of the Data Protection Act 2018,(UK GDPR) reference may also be made to Schedule 2 Part 1 Para 2 of the Act which includes, but is not limited to, the following statement:

- 3.4.2 Personal Data processed for any of the following purposes -
- a) the prevention or detection of crime
 - b) the apprehension or prosecution of offenders

are exempt from the subject access provisions in any case 'to the extent that the application of the listed provisions would be likely to prejudice any of the matters mentioned in paragraph (a) or (b).'

Note Each and every application will be assessed on its own merits and general 'blanket exemptions' will not be applied.

3.5 Criminal Procedures and Investigations Act, 1996

The Criminal Procedures and Investigations Act, 1996 came into effect in 1st April 1997 and introduced a statutory framework for the disclosure to defendants of material which the prosecution would not intend to use in the presentation of its own case, (known as unused material). An explanatory summary of the provisions of the Act is contained within the procedural manual, but disclosure of unused material under the provisions of this Act should not be confused with the obligations placed on the data controller by the Data Protection Act 2018..

Section 4 Accountability and Public Information

4.1 The Public

- 4.1.1 For reasons of security and confidentiality, and in accordance with the Centre's requirement to operate as a Category II Alarm Receiving Centre, (The higher category which is required for supporting functions such as police response), access to the Enfield Public Safety Centre (E.P.S.C) is restricted and in accordance with this Code of Practice.
- 4.1.2 Cameras will not be used to look into private residential property. Where the equipment permits it 'Privacy zones' may be programmed into the system as required in order to ensure that the interior of any private residential property within range of the system is not surveyed by the cameras. In any case, if such 'zones' are not programmed; all operators will be specifically trained in privacy issues.
- 4.1.3 A list/Map of public street VSS cameras is available on the council's website. which is reviewed monthly and can be viewed on the following [Enfield Public Safety Centre | Enfield Council](#)
- 4.1.4 To ensure probity and audit of the system all cameras will record at varying frame rates according to need and retained for a minimum period of 31 days for street cameras or 14 days' minimum for High Definition (HD) cameras and remote building camera systems but may vary up to 31 days dependant on risk.
- 4.1.5 Independent inspection, Inspectorate Audits, live oversight of images by the police and regular audit and maintenance checks by EPSC staff will ensure that all cameras connected to the system are recording 24/7 and to the required quality and all faults notified to management to rectify.
- 4.1.6 Any member of the public wishing to register a complaint with regard to any aspect of The System may do so by contacting the Centre Manager in writing at the following address. **Darren Woods Centre Manager, Enfield Public Safety Centre, Centre Way, Claverings Industrial Estate, Edmonton N9 0AH.** All complaints shall be dealt with in accordance with *London Borough of Enfield's* complaints procedure, a copy of which may be obtained from *London Borough of Enfield's* office(s). Any performance issues identified will be considered under the organisation's disciplinary procedures to which all members of London Borough of Enfield, including contracted personnel are subject.
- 4.1.7 In the event a complaint relates to operations or usage of other partners cameras or images, the Centre Manager will notify as soon as possible the client representative and assist them in any investigation to resolve the matter.
- 4.1.8 All Operating staff are contractually subject to regulations governing confidentiality and discipline. Any individual member of the public who suffers damage or distress by reason of any contravention of this Code of Practice may be entitled to compensation.

4.2 **System Owner**

- 4.2.1 The Public Safety Centre Manager, London Borough of Enfield, at Appendix A, being the nominated representative of the system owners, will have unrestricted personal access to the Centre and will be the responsible Officer for receiving regular and frequent management, operational, emergency and performance reports from the security company contracted with the general responsibility for the operation of the system.

4.2.2 Formal consultation will take place between the owners, partners and the manager of the system with regard to all aspects of this Code of Practice.

4.3 System Centre Manager

4.3.1 The nominated manager named at Appendix A will have day-to-day responsibility for the system as a whole.

4.3.2 The system may be subject to audit by London Borough of Enfield's audit body, (or nominated deputy whose organisational level of responsibility is at least equal to that of the system manager, but who is not the system manager).

4.3.3 The system may also have independent external DPA audits of the operation and compliance with all aspects of DPA and any issues or breaches found will be reported to senior management and processes addressed as required.

4.3.4 The system Centre Manager will ensure that every complaint is reported through to the Council's complaints process and his line manager and will follow the Council's complaint process.

4.3.5 Statistical and other relevant information, including the number of any complaints made, will be included in the statistical reports of London Borough of Enfield, which are made publicly available, and included, on the London Borough of Enfield's Council's website.

4.4 Public Information

4.4.1 Code of Practice

A copy of this Code of Practice shall be published on London Borough of Enfield's web site, and a copy will be made available to anyone on request.

System performance information

System performance will be closely monitored and recorded and compiled into annualised year on year data that shall be made publicly available on the Council's website and to anyone requesting it in accordance with the Protection of Freedoms (POF) Act 2012 transparency requirements.

Signs

Signs (As example shown on page 13) will be placed in the locality of the cameras and at main entrance points to the relevant areas, e.g. Housing, Shopping, Railway and Bus stations. The signs will indicate:

- i) The presence and stated purpose of system monitoring;
- ii) The 'ownership' of the system;
- iii) Contact telephone number of the 'data controller' of the system.

Section 5 Assessment of the System and Code of Practice

5.1 Evaluation

- 5.1.1 The system will undergo annual Inspectorate audits to relevant British Standards to maintain its accreditations for all services it delivers including BS 7958 VSS Management and Operation. Results of the audits will be used to review and develop improvements to processes and maintain accredited service delivery standards.
- 5.1.2 In addition, monthly and annual reviews of the performance of the system will be collated and reviewed in accordance with the Protection of freedoms Act 2012 and any recommended changes or alterations to the specified purpose and objectives of the scheme as well as the functioning, management, camera coverage and operation of the system to be published on the councils website.
- 5.1.3 It is intended that performance evaluations of the system should take place at least annually.

5.2 Monitoring

- 5.2.1 The system manager will accept day to day responsibility for the monitoring, operation and evaluation of the system and the implementation of this Code of Practice.
- 5.2.2 The system manager shall also be responsible for maintaining full management information as to the incidents dealt with by the Monitoring Centre, for use in the management of the system and in annual performance evaluations

5.3 Audit

- 5.3.1 The London Borough of Enfield's auditor or other appropriate person, or their nominated deputy, who is not the system manager, will be responsible for regularly auditing the operation of the system and the compliance with this Code of Practice. Audits, which may be in the form of irregular spot checks, will include examination of the monitoring room records, videotape histories and the content of recorded material.
- 5.3.2 The EPSC will conduct ad-hoc external DPA audits or operational compliance audits by use of Independent Inspectors who are voluntary local residents appointed to review the systems operation and compliance to this code and the POF Act 2012 guiding principals
- 5.3.3 Due to the high security requirements of a UKAS Inspectorate approved Category II Alarm Receiving Centre, there is no general public access to the Control Room itself, and any external (non public) audits may be carried out by on request to local universities as a potential thesis for graduate students etc. who may require to be police cleared and or BS 7858 vetted to carry out this review.

Section 6 Human Resources

6.1 Staffing of the Public Safety Centre and those responsible for the operation of the system

- 6.1.1 The Public Safety Centre will be staffed and operated in accordance with the procedural manual. Equipment associated with The System will only be operated by authorised personnel who have the relevant SIA licence who will have been properly trained in its use and all Centre procedures including this Code of Practice.
- 6.1.2 Every person involved in the management and operation of the system will be personally trained in both the Code of Practice and the Procedural Manual, and be required to sign a confirmation that they fully understand the obligations adherence to these documents places upon them and that any breach will be considered and disciplinary action will be taken. They will be fully conversant with the contents of both documents, which may be updated from time to time, and which he / she will be expected to comply with as far as is reasonably practicable at all times.
- 6.1.3 Arrangement may be made for a police liaison officer to be present in the monitoring Centre at certain times, or indeed at all times, Any such person must also be conversant with this Code of Practice and associated Procedural Manuals held in the control room. a relevant training competency levels as required by the Centre Manager.
All personnel involved with the system shall receive regular training and formal refresher training annually in respect of all legislation appropriate to their role. An on-site training matrix is held in the control room and updated when required

6.2 Discipline

- 6.2.1 Every individual with any responsibility under the terms of this Code of Practice and who has any involvement with The System to which they refer, will be subject to the London Borough of Enfield discipline code, or if contracted staff their own Company discipline procedure's. Any breach of this Code of Practice or of any aspect of confidentiality will be dealt with in accordance with those discipline rules.
- 6.2.2 The system Centre Manager will accept primary responsibility for ensuring there is no breach of security and that the Code of Practice is complied with. They have day to day responsibility for the management of the Centre and for enforcing the discipline rules. Non-compliance with this Code of Practice by any person will be considered a severe breach of discipline and dealt with accordingly including, if appropriate, the instigation of criminal proceedings.

6.3 Declaration of Confidentiality

Every individual with any responsibility under the terms of this Code of Practice and who has any involvement with The System to which they refer, will be required to sign a declaration of confidentiality. Section 8 concerns access to the Monitoring Centre by others. If the siting and usage of a police radio is permitted, all staff will also have to sign up to the Official Secrets Act, and comply with all police instructions for its use, including passing the MPS vetting

Section 7 Control and Operation of Cameras

7.1 Guiding Principles

- 7.1.1 Any person operating the cameras will act with utmost probity and within the law at all times.
- 7.1.2 The cameras, control equipment, recording and reviewing equipment shall at all times only be operated by persons who have been formally trained in their use, or under their direct supervision if under training, and the legislative implications of their use to the standard directed and required by the Centre Manager.
- 7.1.2 Every use of the cameras will accord with the purposes and key objectives of the system and shall be in compliance with this Code of Practice.
- 7.1.3 Cameras will not be used to look into private residential property. 'Privacy zones' shall be programmed into the system (whenever practically possible) in order to ensure that the interior of any private residential property within range of the system is not surveyed by the cameras. Privacy zones will be regularly checked by EPSC staff and logged and or faulted as required.
- 7.1.4 Primary cameras home positions as well as all camera tours shall also be in line with DPA and Human Rights legislation, whether by manual or automatic means to ensure the respect for individual's privacy.
- 7.1.5 Camera operators will be mindful of exercising prejudices, which may lead to complaints of the system being used for purposes other than those for which it is intended. The operators may be required to justify their interest in, or recording of, any particular individual, group of individuals or property at any time by virtue of the audit of the system, by the contract Security company's management, or by the Centre Manager.

7.2 Primary Control

- 7.2.1 Only those trained and authorised members of staff with responsibility for using the VSS equipment will have access to the operating controls in the EPSC or at the DR site location and shall hold a current SIA (Security Industry Authority) Public Space Surveillance operator's licence.

7.3 Secondary Control

There is no secondary control of this system's operating control system, however there is a camera sharing protocol with Transport For London in which permitted cameras are allowed to be used for their DPA and agreed purposes for limited periods with primacy always with the camera owners and auditable usage logged.

7.4 Operation of The System by the Police

- 7.4.1 Under extreme circumstances the Police may make a request to assume direction of The System to which this Code of Practice applies. Only requests made on the written authority of a police officer not below the rank of Superintendent will be considered. Any such request will only be accommodated if approved and authorised by the representative of the System owners, the Centre Manager, or his/her designated deputy of at least equal standing in their absence.

- 7.4.2 In the event of such a request being permitted, the Monitoring Centre will continue to be staffed, and VSS equipment operated by, only those personnel who are trained and authorised to do so, and who fall within the terms of Sections 6 and 7 of this Code. They will then operate under the direction of the police officer designated in the written authority.
- 7.4.3 There is no capability for the police to physically move or control cameras though the ability to view live images for directed management as in 7.4.2 and operational control is in place.all equipment will be operated by the duty operators on shift
- 7.4.4 Any agreed future capability of the EPSC to provide secure remote access to images for live streaming and or bulk data transfer to the police or other agencies will be subject to future agreement and security of data and audit processes approved by the Centre Manager.

7.5 Maintenance of the system

- 7.5.1 To ensure compliance with the Information Commissioners Code of Practice and that images recorded continue to be of appropriate evidential quality The London Borough of Enfield's System shall be maintained in accordance with the requirements under a formal maintenance contract.
- 7.5.2 The maintenance contract will make provision for regular/ periodic service checks on the equipment which will include cleaning of any all-weather domes or housings, checks on the functioning of the equipment, and any minor adjustments that need to be made to the equipment settings to maintain picture and recording quality.
- 7.5.3 The maintenance will also include regular periodic overhaul of all the equipment and replacement of any equipment, which is reaching the end of its serviceable life, or does not perform to its operational requirement as required under the Data Protection Act
- 7.5.4 The maintenance agreement will also provide for 'emergency' attendance by a specialist VSS engineer on site to rectify any loss or severe degradation of image or camera control.
- 7.5.5 The maintenance agreement will define performance criteria permitted for attendance by the engineer and for rectification of the problem depending upon the severity of the event and the operational requirements of that element of the system.
- 7.5.6 If cameras or other equipment is not functioning and beyond its operational or effective service, they are to be replaced promptly and/or the old equipment removed from the system to maintain probity and compliance of the systems effectiveness.
- 7.5.7 It is the responsibility of the system Centre Manager to ensure appropriate records are maintained in respect of the functioning of the cameras and the response of the system maintenance contractor.

Section 8 Access to, and Security of, Monitoring Centre & Associated Equipment

8.1 Authorised Access

8.1.1 Only trained and authorised personnel will operate any of the equipment located within the Enfield Public Safety Centre, (or other equipment associated with the System).

8.2 Public access

8.2.1 Public access to the monitoring and recording facility will be prohibited except for lawful, proper and sufficient reasons and only then with the personal authority of the system manager. Any such visits will be approved and conducted and recorded in accordance with the Procedural Manual and to the BS 5979 Alarm Receiving Centre requirements to maintain its accreditation.

8.3 Authorised Visits

8.3.1 Visits by Independent inspectors or auditors do not fall into the scope of the above paragraph and may take place at any time, without prior warning. No more than TWO inspectors or auditors will visit at any one time but they must be escorted at all times. Inspectors or Auditors will not influence the operation of any part of the system during their visit. The visit will be suspended in the event of it being operationally inconvenient. Any such visit suspended should be recorded in the same way as that described above including the reason for suspension given.

8.4 Declaration of Confidentiality

8.4.1 Regardless of their status, all visitors to the Enfield Public Safety Centre, including inspectors and auditors, will be required to sign into the electronic visitor's system and in doing so accept the declaration of confidentiality. signage is also displayed.

8.5 Security

8.5.1 Authorised personnel will normally be present at all times when the equipment is in use and the centre operates 24/7. In the event of the Public Safety Centre is to be left unattended for any reason it will be secured. In the event of the Centre having to be evacuated for safety or security reasons, the provisions of the Procedural Manual will be complied with.

8.5.2 The Public Safety Centre will at all times be secured by 'Magnetic-Locks' operated by the operators on duty, and proximity readers for entrance or other equally secure means. No site ID pass will have access to the main site air lock doors enabled to conform to BS 5979 Cat 2 requirements.

Section 9 Management of Recorded Material

9.1 Guiding Principles

- 9.1.1 For the purposes of this Code 'recorded material' means any material recorded by, or as the result of, technical equipment which forms part of The System, but specifically includes images recorded digitally, or by way of video copying, including video prints.
- 9.1.2 Every video or digital recording obtained by using The System has the potential of containing material that has to be admitted in evidence at some point during its life span. It is a requirement that all Cameras operated by this system are recorded 24/7 if their operational requirement and purpose is crime detection and prevention or public safety.
- 9.1.3 Members of the community must have total confidence that information recorded about their ordinary everyday activities by virtue of The System, will be treated with due regard to their individual right to respect for their private and family life. There is an expectation that the public expect The System to be recording 24/7 and to a quality standard able to be provided and admitted in evidence if required.
- 9.1.4 It is therefore of the utmost importance that irrespective of the means or format (e.g. paper copy (still print), digital tape, CD, DVD, portable hard drive, or any form of electronic network transfer processing and storage) of the images obtained from the system, they are treated strictly in accordance with this Code of Practice and the Procedural Manual from the moment they are received by the monitoring room until final destruction (or digital overwrite) . Every movement and usage of recorded material will be meticulously logged as

must the regular daily inspection of recordings of all cameras and all faults notified according to procedures.

9.1.5 Access to and the use of recorded material will be strictly for the purposes defined in this Code of Practice or other Codes in use for other services provide by the Centre only.

9.1.6 Recorded material will not be copied, sold, otherwise released or used for commercial purposes or for the provision of entertainment save that of educational value (if personal data redacted)

9.2 National standard for the release of data to a third party

9.2.1 Every request for the release of personal data generated by this the System will be channelled through the System Centre Manager. The System Centre Manager will ensure the principles contained within Appendix B to this Code of Practice are followed at all times.

9.2.2 In complying with the national standard for the release of data to third parties, it is intended, as far as reasonably practicable, to safeguard the individual's rights to privacy and to give effect to the following principles:

- Recorded material shall be processed lawfully and fairly, and used only for the purposes defined in this Code of Practice;
- Access to recorded material will only take place in accordance with the standards outlined in appendix B and this Code of Practice;
- The release or disclosure of data for commercial or entertainment purposes is specifically prohibited.

9.2.3 Members of the police service or other agency having a statutory authority to investigate and / or prosecute offences may, subject to compliance with appendix B, release details of recorded information to the media only in an effort to identify alleged offenders or potential witnesses. Under such circumstances, full details will be recorded in accordance with the Procedural Manual.

9.2.4 If material is to be shown to witnesses, including police officers, for the purpose of obtaining identification evidence, it must be shown in accordance with Appendix B and the Procedural Manual.

9.2.5 It may be beneficial to make use of 'real' media footage for the training and education of those involved in the operation and management of video Surveillance systems, and for those involved in the investigation, prevention and detection of crime. Any material recorded by virtue of this Monitoring system will only be used for such bona fide training and education purposes. Recorded material will not be released for commercial or entertainment purposes.

9.3 Recording media - Provision & Quality

9.3.1 To ensure the quality of the digital media, and that recorded information will meet the criteria outlined by current Home Office guidelines, a networked digital recording system and specification has been used which conforms to the best practice guidance identified by the CAST (Centre for the Applied Science and Technology) of the Home Office and of BS EN 62676 the new standard for *Video Surveillance Systems for use in Security Applications*.

9.4 Media - Retention

9.4.1 Recorded digital media will be retained for a minimum period of 31 days in line with Home Office recommendations in the case of community safety cameras, with the exception of 14

days for High Definition (HD) cameras. Sites with VSS alarm building security systems may record between 14 days and 31 days dependant on risk.

9.4.2 The digital networked recording system automatically overwrites any unused or unsaved material, which conforms to the DPA principal dealing with the requirement for unnecessary storage and retention of data.

9.4.3 Media will be always be used and stored in accordance with the Procedural Manual and produced according to PACE (police and Criminal Evidence Act) standards. All cameras with an operational requirement of crime prevention and detection or public safety must record 24/7 at varying frame rates according to need but if street cameras retained for 31 days, and to a quality standard to meet DPA requirements.

9.5 Media Register

9.5.1 The digital recording system has, in addition to any paper records and retains a unique audit record of all recordings produced from the system. The system records identifies every use, and person who has viewed, produced evidence, or had access to the media in order to comply with the security of data principal requirement of the DPA Act. However, the handover of evidence document is the main process for evidence review, download and evidence handling and copies of these are scanned and retained.

9.6 Recording Policy

9.6.1 Subject to the equipment functioning correctly, images from every camera will be digitally recorded throughout every 24-hour period at various frame rates according to need, onto digital hard disk drive HDD network servers. Enfield Council's own recording rate for street cameras is full frame rate (25fps) at high resolution.

9.6.2 Images from selected cameras that are being actively controlled by operators are in addition automatically digitally recorded in real time onto the real time network server during their selection and control by operators as a means of audit of operators work and usage of cameras.

9.7 Evidential media

9.7.1 In the event of media being required for evidential purposes the procedures outlined in the Procedural Manual will be strictly complied with.

Section 10

Still Image Prints

10.1 Guiding Principles

- 10.1.1 A video still image print is a copy of an image or images which already exist on videotape / computer disc. Such prints are equally within the definitions of 'data' and recorded material
- 10.1.2 Video prints will not be taken as a matter of routine. Each time a print is made it must be capable of justification by the originator who will be responsible for recording the full circumstances under which the print is taken in accordance with the Procedural Manual.
- 10.1.3 Video prints contain data and will therefore only be released under the terms of Appendix B to this Code of Practice, 'Release of data to third parties'. If prints are released to the media, (in compliance with Appendix B), in an effort to identify alleged offenders or potential witnesses, full details will be recorded in accordance with the Procedural Manual.
- 10.1.4 A record will be maintained of all video print productions in accordance with the Procedural Manual. The recorded details will include: a sequential number, the date, time and location of the incident, date and time of the production of the print and the identity of the person requesting the print, (if relevant) and the purpose for which the print was taken.
- 10.1.5 The records of the video prints taken will be subject to audit in common with all other records in the system.

Appendix A Key Personnel and Responsibilities

1. System Owners

Your nominated representative: Darren Woods

Tel: 0208 379 8888

London Borough of Enfield

Email CCTV@enfield.gov.uk

Enfield Public Safety Centre

Centre Way

Claverings Industrial Estate

Edmonton

N9 0AH

Responsibilities:

London Borough of Enfield is the 'owner' of the system. London Borough of Enfield's representative will be the single point of reference on behalf of the owners (the authority). Their role will include a responsibility to:

- i) Ensure the provision and maintenance of all equipment forming part of the London Borough of Enfield System in accordance with contractual arrangements, which the owners may from time to time enter into.
- ii) Ensure the interests of the owners (the authority) and other organisations or clients in the scheme are upheld in accordance with the terms of this Code of Practice.
- iii) Agree to any proposed alterations and additions to the system, or this Code of Practice through the Council Centre Management structure.

2. System Management (Contract Security Company)

OCS Group UK Limited

Unit 5 The Enterprise Centre

Kelvin Lane

Manor Royal

Crawley

RH10 9PE

Responsibilities:

Darren Woods is the 'Centre Manager' of the London Borough of Enfield's System

They have delegated authority for data control on behalf of the 'data controller'.

Their role includes responsibility to:

- i) Maintain day to day management of the system and staff;
- ii) Accept overall responsibility for the system and for ensuring that this Code of Practice is complied with;
- iii) Maintain direct liaison with operating partners and clients.

Appendix B National Standard for the release of data to third parties

1. Introduction

Arguably VSS is one of the most powerful tools to be developed during recent years to assist with efforts to combat crime and disorder whilst enhancing community safety. Equally, it may be regarded by some as the most potent infringement of people's liberty. If users, owners and managers of such systems are to command the respect and support of the general public, the systems must not only be used with the utmost probity at all times, they must be used in a manner which stands up to scrutiny and is accountable to the very people they are aiming to protect.

London Borough of Enfield/partners are committed to the belief that everyone has the right to respect for his or her private and family life and their home. Although the use of VSS cameras has become widely accepted in the UK as an effective security tool, those people who do express concern tend to do so over the handling of the information (data) which the System gathers.

After considerable research and consultation, the nationally recommended standard of The VSS (CCTV) User Group has been adopted by the System owners.

2. General Policy

All requests for the release of data shall be processed in accordance with the Procedure Manual. All such requests shall be channelled through the data controller.

Note: The *data controller* is the person who (either alone or jointly with others) determines the purpose for which and the manner in which any personal data are, or are to be processed.

(In most cases the data controller is likely to be the scheme owners or for a 'partnership' the partners share responsibility)

Day to day responsibility may be devolved, usually to the scheme Centre Manager.

3. Primary Request to View Data

a) Primary requests to view data generated by a Video Surveillance System are likely to be made by third parties for any one or more of the following purposes:

- i) Providing evidence in criminal proceedings (e.g. Police and Criminal Evidence Act 1984, Criminal Procedures & Investigations Act 1996, etc.);
- ii) Providing evidence in civil proceedings or tribunals
- iii) The prevention of crime
- iv) The investigation and detection of crime (may include identification of offenders)
- v) Identification of witnesses

b) Third parties, which are required to show adequate grounds for disclosure of data within the above criteria, may include, but are not limited to:

- i) Police

- ii) Statutory authorities with powers to prosecute, (e.g. Customs and Excise; Trading Standards DWP, etc.)
 - iii) Solicitors.
 - iv) Plaintiffs in civil proceedings.
 - v) Accused persons or defendants in criminal proceedings.
 - iv) Other agencies, (which should be specified in the Code of Practice) according to purpose and legal status.
- c) Upon receipt from a third party of a bona fide request for the release of data, the data controller shall:
- i) Not unduly obstruct a third-party investigation to verify the existence of relevant data.
 - ii) Ensure the retention of data which may be relevant to a request, but which may be pending application for, or the issue of, a court order or subpoena. A time limit shall be imposed on such retention, which will be notified at the time of the request.
- Note:** *A time limit could apply providing reasonable notice was issued to the agent, prior to the destruction of the held data, (e.g. a time limit was about to expire).*
- d) In circumstances outlined at note (3) below, (requests by plaintiffs, accused persons or defendants) the data controller, or nominated representative, shall:
- i) Be satisfied that there is no connection with any existing data held by the police in connection with the same investigation. Internal checks to be carried out to confirm.
 - ii) Treat all such enquiries with strict confidentiality.

Notes

- (1) *The release of data to the police is not be restricted to the civil police but could include, (for example) British Transport Police, Ministry of Defence Police, Military Police, etc.*
- (2) *Aside from criminal investigations, data may be of evidential value in respect of civil proceedings or tribunals. In such cases a solicitor, or authorised representative of the tribunal, is required to give relevant information in writing prior to a search being granted. In the event of a search resulting in a requirement being made for the release of data, such release will only be facilitated on the instructions of a court order or subpoena. A charge may be made for this service to cover costs incurred. In all circumstances data will only be released for lawful and proper purposes.*
- (3) *There may be occasions when an enquiry by a plaintiff, an accused person, a defendant or a defence solicitor falls outside the terms of disclosure or subject access legislation. An example could be the investigation of an alibi. Such an enquiry may not form part of a prosecution investigation.*

Defence enquiries could also arise in a case where there appeared to be no recorded evidence in a prosecution investigation.

- (4) The data controller shall decide which (if any) "other agencies" might be permitted access to data. Having identified those 'other agencies', such access to data will only be permitted in compliance with this Standard.*
- (5) The data controller can refuse an individual request to view if insufficient or inaccurate information is provided. A search request should specify reasonable accuracy (could be specified to the nearest ½ hour)*

4. Secondary Request to View Data

- a) A 'secondary' request for access to data may be defined as any request being made which does not fall into the category of a primary request. Before complying with a secondary request, the data controller shall ensure that:
 - i) The request does not contravene, and that compliance with the request would not breach, current relevant legislation, (e.g. UK GDPR and Data Protection Act 2018, Data Protection Act 2018, Human Rights Act 1998, section 163 Criminal Justice and Public Order Act 1994, etc.);
 - ii) Any legislative requirements have been complied with;
 - iii) Due regard has been taken of any known case law (current or past) which may be relevant, (e.g. R v Brentwood BC ex p. Peck) and
 - iv) The request would pass a test of 'disclosure in the public interest' (1).
- b) If, in compliance with a secondary request to view data, a decision is taken to release material to a third party, the following safeguards shall be put in place before surrendering the material:
 - i) In respect of material to be released under the auspices of 'crime prevention', written agreement to the release of the material should be obtained from a police officer, not below the rank of Inspector. The officer should have personal knowledge of the circumstances of the crime/s to be prevented and an understanding of the VSS (CCTV) Code of Practice.
 - ii) If the material is to be released under the auspices of 'public well being, health or safety', written agreement to the release of material should be obtained from a senior officer within the Local Authority, preferably within the legal department. The officer should have personal knowledge of the potential benefit

(and risks) to be derived from releasing the (or refusing to release) material and an understanding of the Video surveillance System Code of Practice.

- c) Recorded material may be used for bona fide training purposes such as police or staff training. Under no circumstances will recorded material be released for commercial sale of material for training or entertainment purposes.

Note:

- (1) *'Disclosure in the public interest' could include the disclosure of personal data that:*
 - i) *Provides specific information which would be of value or of interest to the public well being*
 - ii) *Identifies a public health or safety issue*
 - iii) *Leads to the prevention of crime*
- (2) *The disclosure of personal data which is the subject of a 'live' criminal investigation would always come under the terms of a primary request, (see III above).*

5 Individual Subject Access under Data Protection legislation

- 1) Under the terms of Data Protection legislation, individual access to personal data, of which that individual is the data subject, must be permitted providing:
 - i) The request is made in writing;
 - ii) The data controller is supplied with sufficient information to satisfy him or her self as to the identity of the person making the request;
 - iii) The person making the request provides sufficient and accurate information about the time, date and place to enable the data controller to locate the information, which that person seeks, (it is recognised that a person making a request is unlikely to know the precise time. Under those circumstances it is suggested that within one hour of accuracy would be a reasonable requirement);
 - iv) The person making the request is only shown information relevant to that particular search and which contains personal data of her or him self only, unless all other individuals who may be identified from the same information have consented to the disclosure;
- b) In the event of the data controller complying with a request to supply a copy of the data to the subject, only data pertaining to the individual should be copied, (all other personal data which may facilitate the identification of any other person should be concealed or erased).
- c) The data controller is entitled to refuse an individual request to view data under these provisions if insufficient or inaccurate information is provided, however every effort

should be made to comply with subject access procedures and each request should be treated on its own merit.

- d) In addition to the principles contained within the Data Protection legislation, the data controller should be satisfied that the data is:
 - i) Not currently and, as far as can be reasonably ascertained, not likely to become, part of a 'live' criminal investigation;
 - ii) Not currently and, as far as can be reasonably ascertained, not likely to become, relevant to civil proceedings;
 - iii) Not the subject of a complaint or dispute which has not been actioned;
 - iv) The original data and that the audit trail has been maintained;
 - v) Not removed or copied without proper authority;
 - v) For individual disclosure only (i.e. to be disclosed to a named subject)

6. Process of Disclosure:

- a) Verify the accuracy of the request.
- b) Replay the data to the requestee only, (or responsible person acting on behalf of the person making the request).
- c) The viewing should take place in a separate room and not in the control or monitoring area. Only data that is specific to the search request shall be shown.
- d) It must not be possible to identify any other individual from the information being shown, (any such information will be blanked-out, either by means of electronic screening or manual editing on the monitor screen).
- e) If a copy of the material is requested and there is no on-site means of editing out other personal data, then the material shall be sent to an editing house for processing prior to being sent to the requester.

Note: The Information Commissioners Code of Practice for video Surveillance systems makes specific requirements for the precautions to be taken when images are sent to an editing house for processing.

7. Media disclosure

Set procedures for release of data to a third party should be followed, if the means of editing out other personal data does not exist on-site, measures should include the following:

- a) In the event of a request from the media for access to recorded material, the procedures outlined under 'secondary request to view data' shall be followed. If material is to be released the following procedures shall be adopted:
 - i) The release of the material must be accompanied by a signed release document that clearly states what the data will be used for and sets out the limits on its use.
 - ii) The release form shall state that the receiver must process the data in a manner prescribed by the data controller, e.g. specific identities/data that must not be revealed.
 - iii) It shall require that proof of any editing must be passed back to the data controller, either for approval or final consent, prior to its intended use by the

media (protecting the position of the data controller who would be responsible for any infringement of Data Protection legislation and the System's Code of Practice).

iv) The release form shall be considered a contract and signed by both parties (1).

Note in the well publicised case of R v Brentwood Borough Council, ex parte Geoffrey Dennis Peck, (QBD November 1997), the judge concluded that by releasing the video footage, the Council had not acted unlawfully. A verbal assurance that the broadcasters would mask the identity of the individual had been obtained. Despite further attempts by the Council to ensure the identity would not be revealed, the television company did in fact broadcast footage during which the identity of Peck was not concealed. The judge concluded that tighter guidelines should be considered to avoid future accidental broadcasts.

Attention is drawn the requirements of the Information Commissioners in this respect detailed in there Code of Practice summarised above.

8. Principles

In adopting this national standard for the release of data to third parties, it is intended, as far as reasonably practicable, to safeguard the individual's rights to privacy and to give effect to the following principles:

- a) Recorded material shall be processed lawfully and fairly and used only for the purposes defined in the Code of Practice for the VSS scheme;
- b) Access to recorded material shall only take place in accordance with this Standard and the Code of Practice;
- c) The release or disclosure of data for commercial or entertainment purposes is specifically prohibited unless the purpose is to promote public safety and the centres permitted purposes, and only by prior agreement of the council.

Appendix C Protection of Freedoms Act 2012, Sect 30 12 Guiding Principals

Guiding Principles (Extract from amended Camera Surveillance Code of Practice Nov 2021)

2.6 System operators should adopt the following 12 guiding principles:

1. Use of a surveillance camera system must always be for a specified purpose which is in pursuit of a legitimate aim and necessary to meet an identified pressing need.
2. The user of a surveillance camera system must consider its effect on individuals and their privacy, with regular reviews to ensure its use remains justified.
3. There must be as much transparency in the use of a surveillance camera system as possible, including a published contact point for access to information and complaints.
4. There must be clear responsibility and accountability for all surveillance camera system activities including images and information collected, held and used.
5. Clear rules, policies and procedures must be in place before a surveillance camera system is used, and these must be communicated to all who need to comply with them.

6. No more images and information should be stored than that which is strictly required for the stated purpose of a surveillance camera system, and such images and information should be deleted once their purposes have been discharged.
7. Access to retained images and information should be restricted and there must be clearly defined rules on who can gain access and for what purpose such access is granted; the disclosure of images and information should only take place when it is necessary for such a purpose or for law enforcement purposes.
8. Surveillance camera system operators should consider any approved operational, technical and competency standards relevant to a system and its purpose and work to meet and maintain those standards.
9. Surveillance camera system images and information should be subject to appropriate security measures to safeguard against unauthorised access and use.
10. There should be effective review and audit mechanisms to ensure legal requirements, policies and standards are followed in practice, and regular reports should be published.
11. When the use of a surveillance camera system is in pursuit of a legitimate aim, and there is a pressing need for its use, it should then be used in the most effective way to support public safety and law enforcement with the aim of processing images and information of evidential value.
12. Any information used to support a surveillance camera system which compares against a reference database for matching purposes should be accurate and kept up to date.
