
I attended a meeting on line last thursday with planning officers about the ELP.

One of the issues raised was the lack of clarity and accuracy in the map of Crews Hill (Figure 3.10) . There is shading and crosshatching and arrows with no key or other explanation of what is meant. No explanation was forthcoming at the meeting.

This has potentially important implications for understanding Green Belt status and actual land use of different parts of Crews hill.

I look forward to prompt clarification before we submit detailed objections to the plans.

sincerely
