

---

I'm very alarmed at the prospect of a crematorium being placed right in the centre of a public park that has become a vital public amenity over the last two years.

This area seems to be largely ignored by the council, no children's playground, no adult facilities eg outdoor gym, community hub etc. It took the local community to push for and develop the facilities now present and the council's response is to put a crematorium right in the middle of them.

I request you to remove all reference to Firs Farm wetlands from policy SP CL4.
