

---

Our choice to move to the area of Hadley Wood has been because of the beautiful Green Belt and the numerous of scenic hiking routes it contains through the wonderful unspoilt nature.

We therefore object to the proposed site allocation, which would allow the development of 160 homes on Green Belt land.

Please do not build houses on the Green Belt, the green must be protected and preserved for heritage, biodiversity and air quality purposes. The Conservation Area of Hadley Wood would also be damaged, and the boosting of road traffic in an already congested area would cause a highly detrimental impact on the environment and carbon footprint.

Please stop the climate change by stopping the development of 160 homes in our beautiful Green Belt.
