
Good morning,

Re: Proposals SPPL10

My name is Maria Giudice and I live close to the proposed development site on Vicarage Farm.

I am not going to pretend to be an expert on planning or housing laws and regulations, all I know is that we have been privileged to live and use this stunning area of green belt for over 20 years. I write to you on a purely personal level.

Throughout our time living in this area and especially during the pandemic we have seen this area of green belt increasingly used by people of all ages who have appreciated the wildlife habitat and quite simply beautiful views of this part of Enfield.

Our own children and their friends happily and frequently put down their gadgets and devices to use their bikes and walking boots to enjoy the outdoor experience and improve their physical and mental well-being.

I whole heartedly agree that all people deserve to live in decent standards of housing, however recent developments in Chase Farm Hospital and Trent Park have certainly not supplied affordable low-cost starter homes for people. Trent Park semis are in-fact marketed at over £1,500,000 as I'm sure you're aware.

I implore you to help save this beautiful loved area of Enfield for us and generations to come.

We are mere custodians for a brief time and should not feel guilty that we have some green spaces for us all in Enfield to enjoy and use.

Thank you for reading this email.
